

# Minutes of meeting

Date: 18/01/2024

Group members attended: Danila, Nazim, Angel

- Showed UI improvements on the Web Application.
- Pending back-end work on the stock page due to errors during stock amount updates.
- Created an activity diagram explaining the flow of the auto-scheduling algorithm.
- Activity diagram file not found in the repository; committed to sending it after the meeting.
- Implemented BSN and its encryption in the database; passwords are now hashed.
- Discussed a small UI change in the table view of the shift tab.
- Tested filtering in front of the tutor.
- System did not display employees initially; problem wasn't in the system, Nazim didn't pay attention if the date was correct.
- Tutor emphasized the importance of ensuring everything works for the final presentation.
