

Minutes of Meeting

Date: 08/01/2024

Group Members Present: Nazim, Danila, Angel

Topics to Be Discussed: Win Forms Functionalities

Main Priority: Communication and Automation

In our pursuit of algorithmic excellence, we have introduced subtle UI changes, particularly in the areas of vacations and employee functionalities. Notably, an extended message auto-generation feature has been implemented, and additional auto-scheduling algorithm enhancement was discussed.

Acknowledging the significance of client input, we have received a suggestion to consult our tutor for additional insights into improving the auto-scheduling algorithm. To ensure transparency and understanding, we are considering the creation of a document that provides a robust justification for proposed modifications.

Furthermore, meticulous record-keeping of all interactions with tutors and clients is a priority for us
